## REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Moreau Thierry U.S. Pat. No. 6,061,791 discloses a secret cryptographic key that assigns to an applicant, which includes a secret registration process. The secret key will be loaded on a portable memory device or other secret key store of the applicant.

Hayashi Masahiro discloses an IC card that contains a public key certificate consisting of a public key and a digital signature of a certificate agency with respect to the public key and a private key.

However, neither Moreau nor Hayashi singularly or in combination fails to anticipate or render obvious the recited feature:

As per claims 1, 15, 30, 34, 38, 42, and 46 "receiving from a seller a digital certificate associated with a buyer, said digital certificate including a first verification key and an encrypted version of a personal identification number (PIN), said digital certificate including a binding between at least a portion of said financial account datum and said public key using a second verification key associated with a trusted party performing said binding; decrypting said encrypted version of said PIN using said second verification key or a key associated with said second verification key, thereby verifying said first verification key was bound using said second verification key by said trusted party that performed said binding".

## EXAMINER'S AMENDMENT

2. Please cancel claims 46–58 and 65 without prejudice.

Confirmed by Brian Young Reg. No. 48,602.
